

Weekly Report 9/4/2023 – 10/11/2023

- Formed group and set up stream of communication.
- Completed Lab 1
 - Downloaded all dependencies
 - Set up github
 - Set up Python virtual environment
 - Complete Image processing tutorials
- Issues with Lab 1
 - Most of the lab went flawlessly the only issue was with setting up the virtual environments.
 - I continually had HTTP requests fail for downloading the proper files
 - After multiple attempts though each taking 5-7 minutes I was able to get it completed.
- Image Processing
 - The image processing part of the lab was very informative and intellectually engaging.
 - It took a little bit to get use to using open CV but I have some experience with python and python libraries so it wasn't too difficult.
- I have started brainstorming ideas for project but have not made any headway there.

LAB RESULTS:
